Cleaning

#1

Washing Machine Cleaning

Eliminate odours caused by low temperature washes, limescale and detergent build up. These act as a breeding ground for mould.

Run a bag full of soda crystals through an empty load on the hottest wash.

#2

Sinks & Drains

A weekly mugful poured down drains with hot water will prevent greasy build-ups and blockages

#3

Barbecues

Clean units and grilling racks with a warm solution of soda crystals.

Use liquid soda crystals to quickly wipe grills in-between uses. Wipe down with a hot wet cloth afterwards.

#4

Paths & Patios

Sprinkle soda crystals, wet and leave to turn moss brown. Brush away afterwards. No more slippy paths!

#5

Hobs & Extractors*

#6

Pots & Pans*

Leave to soak overnight to remove burnt on food

Laundry

Water Softening

Tip #7

Stain Removal

Tip #8

Workwear

#9

#10

Pre-wash soak

Soda Crystals soften the water, so you need less detergent and helps keep the machine free of limescale. They are tough on grease & stains so ideal for use with heavily soiled garments. Use in wash and also as a pre-wash soak for really stubborn stains

* Do NOT use Soda Crystals on aluminium
